

## 03 - XSLT assignment

### XSLT Assignment:

The objective of this assignment is the creation of a transformation system that given a Topic

Map in XTM or given a Thesauri in XML, the program could translate the source into an Ontology

in OWL.

Your report should contain:

- The files used as source code in XML (XTM, XML)
- The OWL exported file resulting of the transformation process of your program
- The .ppt presentation explaining what you did
- The CODE used for XSLT or another code in JAVA/.NET
- Possible descriptions and/or comments you find necessary
